CONTENTS

Preface
David Okaya, Tim Stern, and Fred Davey ........................................................................................................ vii

Continent-Continent Collision at the Pacific/Indo-Australian Plate Boundary:
Background, Motivation, and Principal Results
David Okaya, Tim Stern, Fred Davey, Stuart Henrys, and Simon Cox .......................................................... 1

SECTION I: Regional Framework of Pacific/Indo-Australian Plate Boundary

Regional Geological Framework of South Island, New Zealand, and its Significance for
Understanding the Active Plate Boundary
Simon C. Cox and Rupert Sutherland .............................................................................................................. 19

Geophysical Structure of the Southern Alps Orogen, South Island, New Zealand
and H. van Avendonk .................................................................................................................................... 47

Kinematic Constraints from GPS on Oblique Convergence of the Pacific and Australian Plates,
Central South Island, New Zealand
John Beavan, Susan Ellis, Laura Wallace, and Paul Denys ............................................................................ 75

Seismic Anisotropy in South Island, New Zealand
Martha Kane Savage, Mathieu Duclos, Katrina Marson-Pidgeon .................................................................. 95

Crustal Thickness and Pn Anisotropy Beneath the Southern Alps Oblique Collision, New Zealand
S. Bourguignon, M. K. Savage and T. Stern .................................................................................................. 117

Compressional and Shear Wave Velocities in South Island New Zealand Rocks and Their Application
to the Interpretation of Seismological Models of the New Zealand Crust
Nikolas I. Christensen and David A. Okaya ................................................................................................. 125

SECTION II: The Plate Boundary (Alpine Fault) & Associated Mountain Building
(Southern Alps)

The Alpine Fault, New Zealand: Surface Geology and Field Relationships
Richard J. Norris and Alan F. Cooper ............................................................................................................ 159

Deformation of the Pacific Plate Above the Alpine Fault Ramp and its Relationship to Expulsion of
Metamorphic Fluids: an Array of Backsperms
Ruth H. Wightman and Timothy A. Little ...................................................................................................... 179

Geophysical Exploration and Dynamics of the Alpine Fault Zone
Tim Stern, David Okaya, Stefan Kleffmann, Martin Scherwath, Stuart Henrys, and Fred Davey ............ 209
Do Great Earthquakes Occur on the Alpine Fault in Central South Island, New Zealand?

SECTION III: Plate Boundary Dynamics

Three-Dimensional Geodynamic Framework for the Central Southern Alps, New Zealand: Integrating Geology, Geophysics and Mechanical Observations
Phaedra Upton and Peter O. Koons

Transpression Models and Ductile Deformation of the Lower Crust of the Pacific Plate in the Central Southern Alps, a Perspective From Structural Geology
Timothy Little, Ruth Wightman, Rodney J. Holcombe, and Matthew Hill

Modeling Strain and Anisotropy Along the Alpine Fault, South Island, New Zealand
M. K. Savage, A. Tommasi, S. Ellis, and J. Chery

SECTION IV: Comparisons

A Comparison Between the Transpressional Plate Boundaries of the South Island, New Zealand, and Southern California, USA: The Alpine and San Andreas Fault Systems
Gary S. Fuis, Monica D. Kohler, Martin Scherwath, Uri ten Brink, Harm J.A. Van Avendonk, and Janice M. Murphy

Taiwan and South Island, New Zealand - A Comparison of Continental Collisional Orogenies
F. Wu, F. Davey, and D. Okaya

Seismogenic, Electrically Conductive, and Fluid Zones at Continental Plate Boundaries in New Zealand, Himalaya, and California, USA
George R. Jiracek, Victor M. Gonzalez, T. Grant Caldwell, Philip E. Wannamaker, and Debi Kilb
